

Zagreb, 11.03.2019

MINISTRY OF SCIENCE
AND EDUCATION
OF THE REPUBLIC OF CROATIA

Space solutions are all around you

Space helps address global challenges

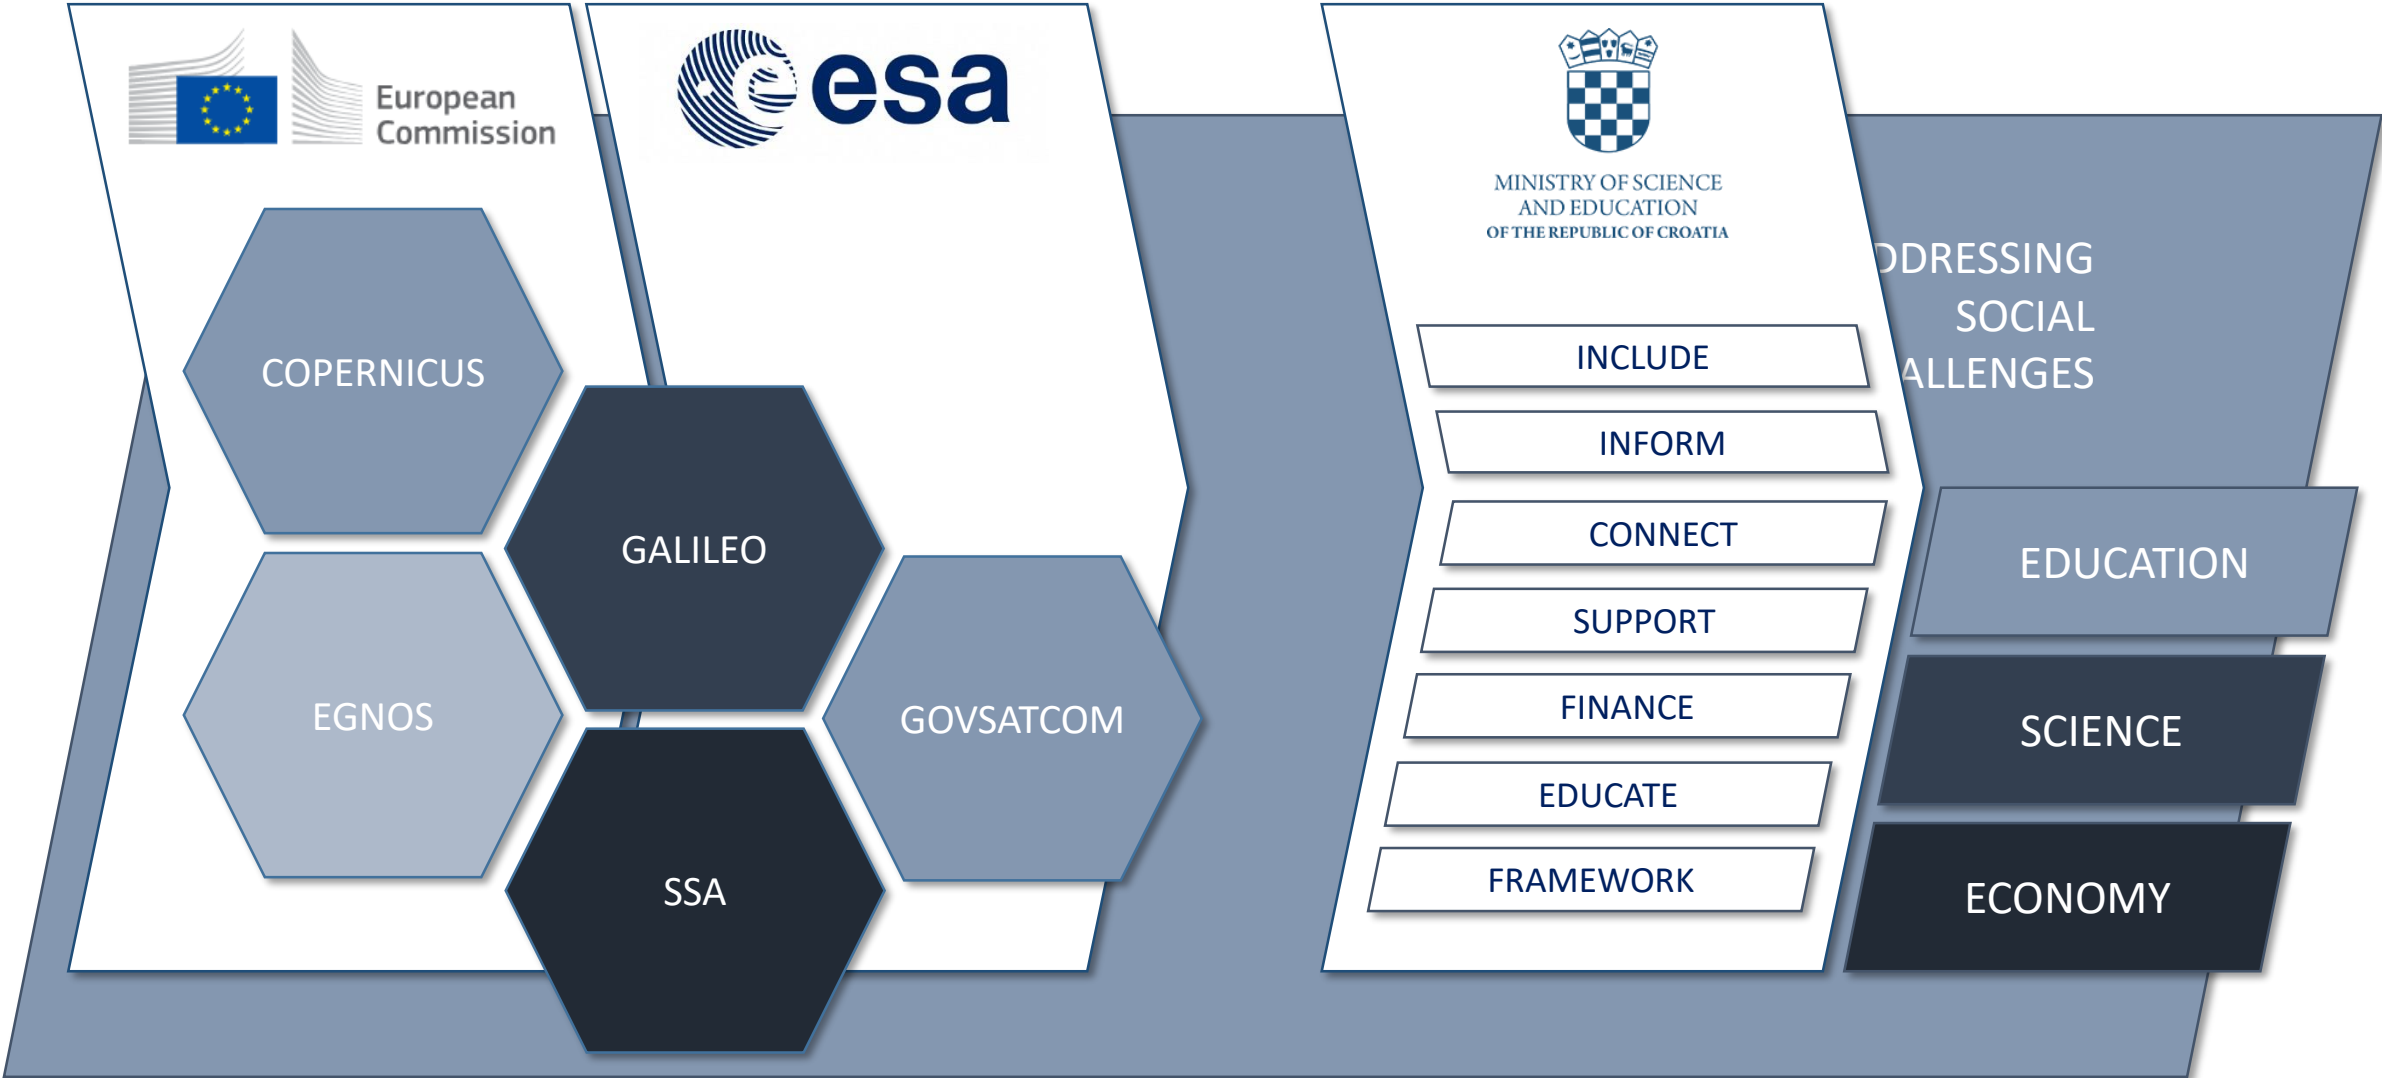

European union – Space Strategy for Europe

1. Maximising the benefits of space for society and EU economy
 1. Encouraging the uptake of space services and data
 2. Advancing the EU space programmes and meeting new user needs
2. Fostering a globally competitive and innovative European space sector
 1. Supporting research and innovation and development of skills
 2. Fostering entrepreneurship and new business opportunities
3. Reinforcing Europe's autonomy in accessing and using space in a secure and safe environment
 1. Maintaining Europe's autonomous access to space
 2. Assuring access to radiofrequency spectrum
 3. Ensuring the protection and resilience of critical European space infrastructure
 4. Reinforcing synergies between civil and security space activities
4. Strengthening Europe's role as a global actor and promoting international cooperation

Relations between EU and ESA will be one of the corner stones of success. ESA, with its technical excellence, expertise, capacity and know-how, is an important partner on which the Commission will continue to rely.

Ministry of science and education – taking active role

Next steps with ESA

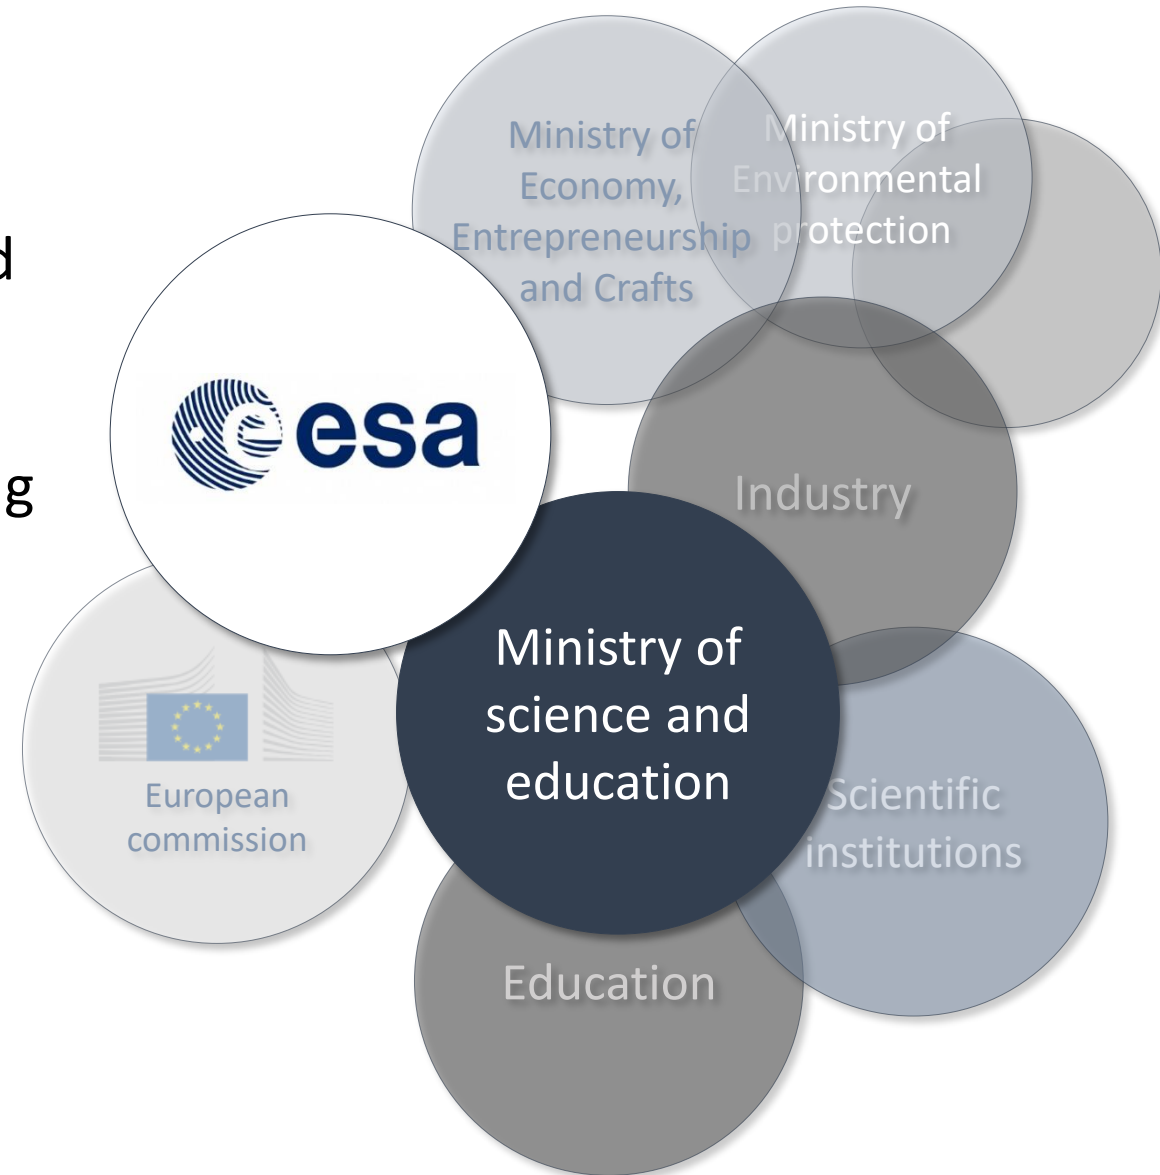

Define areas for cooperation (Implementing Arrangement regarding technical assistance and expertise)

Launching first National call under implementing Agreement during 2019

Cooperating State Agreement

Plan for European Cooperating States – PECS

...
