About BestSDI

The wider objectives of the BESTSDI project is to improve the quality of higher education in Geographical Science and Technology field, SDI and geodesy, enhance its relevance for the labour market and society and to improve the level of competences and skills in HEI's by developing new and innovative education programmes within the field of SDI. These wider objectives are fully compliant with the priorities of the Capacity Building projects within the Erasmus+ program.

The specific project objectives are to develop, test and adapt new curricula, courses, learning material and tools within the field of SDI. In doing so, existing undergraduate and graduate geodesy and geoinformatics curricula's in the academic institutions in the WB region will be lifted to higher levels, recognising the of spatial data for modern society and its development. By the incorporation of SDI concept and other modern concepts based on spatial data and information, the students of the new courses will have the ability to provide efficiently spatial data and services to SDI users.

In parallel, the project also introduces SDI and related concepts in undergraduate and graduate study programs on academic institutions which profiles are well recognized as SDI users, raising awareness among the students and professionals about the relevancy of SDI and advantages of well organized spatial data.

Novi Sad

Novi Sad is located on the Danube, on the intersection of the most important roads, near the mountain of Fruška Gora with 17 culturally and historically significant monasteries, and it is surrounded by typical Vojvodinian ranches. The City of Novi Sad has the necessary diversity of a modern tourist center that aims to and can put itself on a world tourist map. In addition, there are 17th-century Petrovaradin Fortress, appealing old city center, numerous museums, prestigious Novi Sad Fair, as well as many world-famous festivals and events.

Among the many tourist attractions we would like to single out: THE DANUBE is one of the distinguishing features of Novi Sad from the aspect of tourism, especially the famous 'corso' the "Belgrade Quay", as well as numerous beaches along the shore, especially the most beautiful and well maintained "Štrand" («Štrand») which stretches on a 10ha surface with all the supplemental content. The riverside, is also a significant habitat for birds, some of which like the Kovil-Petrovaradin («Koviljsko-petrovaradinski») Isle, are special nature reserves, and are of international significance.

Covering an area of 122ha, built in the 17th and 18th century, it represents a cultural-historical monument. Located within the fortress are the Museum of the City of Novi Sad, the Academy of the Arts, the Observatory as well as the Archives of the City, also it is at this very place, traditionally, in the month of July, that the EXIT Music Festival takes place, proclaimed to be the best in Europe.

THE PETROVARADIN FORTRESS

THE OLD CITY CORE

The architecture of the city represents a mixture of several different styles. The oldest house “At the White Lion” was built in long ago 1740. The city streets boast several beautiful palaces from the end of the 19th and beginning of the 20th century: “Tanurđićeva”, “Menratova”, “Vatikan”, “Klajnova”, etc. as well as sacral architecture belonging to different confessions.

Money

Our currency is dinar (RSD) Most shops will not accept payment in Euro bills. There are many ATM machines in Novi Sad. US dollars, British pounds, Yens and other major currencies can be exchanged at the banks and exchange offices that are present in city. Most banks do not have a fixed fee but take a percentage of the total amount. As this percentage varies, you should do a bit of research before exchanging large amounts of money.

Faculty of Technical Sciences

Faculty of Technical Sciences originates from the Faculty of Mechanical Engineering which was established by the Decree of the National Assembly of People's Republic of Serbia on 18th May 1960 as a Faculty of Mechanical Engineering in Novi Sad and it was a constituent part of the University of Belgrade. After the founding of the University of Novi Sad on 28th June 1960, the Faculty along with six previously established faculties in Vojvodina was regarded as a part of the University of Novi Sad.

In the first period of its development the Faculty provided educational activities for three different profiles of mechanical engineering. In 1971 electrical and civil engineering studies were founded. Establishment of the Department of Electrical Engineering as well as the Department of Civil Engineering brought about the change of its name into the Faculty of Technical Sciences on 22nd April 1974. In 1979/80 academic year started the studies in the area of traffic engineering, and in 1996/97 the first generation of students of architectural engineering was enrolled. In academic year 1999/2000 several different studies for the new professional profile were introduced: Industrial Engineering and Management, Graphic Engineering and Design, and Environmental Engineering.

Legend

-  *UNS Rectorate*
-  *Faculty of Technical Sciences*
-  *Geoinformatics Laboratory*
-  *Entrances*

Study programme for Postal Services and Telecommunications were introduced at the Department for Traffic Engineering in 1999/2000. Interdisciplinary studies of Mechatronics were established in 2002/03 academic year. In 2006/07 academic year the first generation of students of specialist academic studies was enrolled at the Faculty (according to the Law on Higher Education) and the studies of **Geodesy and Geomatics** engineering were introduced into the educational activities of the Faculty in 2007/08 academic year. Furthermore, in 2009/2010 the studies of Safety at Work were established at the Department of Environmental Engineering as well as the undergraduate professional programme at the Department of Power Engineering – Renewable Energy Sources.

In 2011/2012 academic year the following studies were established: Risk and Fire Protection Management, Animation in Engineering as well as undergraduate professional studies Software and Information Technology at the Faculty Department in Inđija; the same study programme was also introduced at the Faculty Department in Loznica in 2012/2013 academic year. In 2013/2014 academic year the following study programmes will be established: Biomedical Engineering, Measurement and Control, Clean Energy Technologies, Stage Architecture, Engineering and Design, Electric Power Software Engineering, Software Engineering and Information Technology in Novi Sad as well as at the Faculty Department in Loznica and undergraduate professional studies within the study programme of Electronics and Telecommunication.
